IMPORTANT INFORMATION REGARDING THE SELECTION OF YOUR CARAVAN

When purchasing a caravan, it is especially important to select not only an appealing design, but also the right layout. Weight also plays an essential role here. Family, friends, optional equipment, accessories, and baggage – there should be enough space for all of this. At the same time, there are legal and technical limits for configuration and loading. Each caravan is designed for a certain weight which must not be exceeded during travel. This raises a question for caravan buyers: How should I configure my vehicle to accommodate baggage and accessories according to my needs without causing the vehicle to exceed this maximum weight? To help you make this decision, we have provided you some information below that is particularly important when selecting your vehicle from our product range:

1. The technically permissible maximum laden mass...

... is a value specified by the manufacturer which the vehicle must not exceed. Based on the layout, ERIBA specifies an upper limit for the vehicle, which can vary from layout to layout (e.g. 1,600 kg, 1,700 kg). You will find the corresponding specification for each layout in the technical data.

	Touring 530	Touring 540
Axle	Mono	Mono
Tyre size	185 R14 C 102 L	185 R14 C 102 L
Overall length (cm)	599	599
Body length (exterior), approx. cm	471	471
Gesamtbreite (cm)	210	210
Interior length (cm)	466	466
Interior width (cm)	200	200
Overall height (cm)	227	227
Roof type	Pop-up roof	Pop-up roof
Headroom in living area (cm)	195	195
A-measurement awning (cm)	730	730
Mass in running order (kg) (+/-5%)*	990 (941 - 1040)*	997 (947 - 1047)*
Manufacturer-specified mass for optional equipment (kg)*	223 / 313 ○	211 / 301 ○
Technically permissible maximum laden mass (kg)*	1300 / 1400 ○	1300 / 1400 ○

2. The mass in running order...

... consists – to put it simply – of the basic vehicle with standard equipment. It is legally permissible and possible for the mass in running order of your vehicle to deviate from the nominal value specified in the sales documents. The permissible tolerance is $\pm 5\%$. The permissible range in kilograms is stated in parentheses after the mass in running order. In order to provide you with full transparency regarding possible weight deviations, ERIBA weighs each vehicle at the end of the line and informs your trading partner of the weighing result of your vehicle for forwarding to you. For detailed explanations of the mass in running order and the effect of tolerances on the minimum payload and the payload, please refer to the “Legal notes” section.

IMPORTANT INFORMATION REGARDING THE SELECTION OF YOUR CARAVAN

3. The standard sleeping berths...

... are specified by the manufacturer and shown in the sales documents. The number of sleeping berths can be increased (e.g. 3-person bunk bed) or, if required, reduced (e.g. sideboard instead of seating group) by selecting optional equipment.

	Touring 530	Touring 540
Axle	Mono	Mono
Berths	3	3
Manufacturer-specified mass for optional equipment (kg)*	223 / 313 O	211 / 301 O

4. The mass for optional equipment specified by the manufacturer...

... is a value set for each layout by ERIBA for the maximum mass of optional equipment that can be ordered. This limit is intended to ensure that the minimum payload, i.e. the legally required free mass for baggage and retrofitted accessories, is actually available for the load capacity of the vehicles delivered by ERIBA. If, in exceptional cases, the weighing at the end of the line nevertheless shows that the actual load capacity falls short of the minimum payload due to a permissible weight deviation, we will check together with your trading partner and you whether we should, for example, increase the load capacity of the vehicle or remove optional equipment before delivering the vehicle. For detailed explanations of the effects of the tolerances on the minimum payload and the payload, please refer to the "Legal notes" section.

Third habitation battery "ERIBA Smart Battery System" (150 Ah Lithium)	
Package price £	3,880.-
Additional weight*	62

5. The additional weight of optional equipment and packages...

... increases the actual mass of the vehicle (= mass in running order plus selected optional equipment) and reduces the payload. The specified value shows the additional weight compared to the standard equipment of the respective layout. The total weight of the selected packages and optional equipment must not exceed the mass for optional equipment specified by the manufacturer.

* INFO

The specified mass in running order is a standard value defined in the type approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5% of the mass in running order are legally permissible and possible. The permissible range in kilograms is stated in parentheses after the mass in running order. The mass for optional equipment specified by the manufacturer is an imputed value determined for each type and layout by which ERIBA specifies the maximum weight available for factory-fitted optional equipment. The purpose of limiting optional equipment is to ensure that the minimum payload, i.e. the legally required free mass for baggage and retrofitted accessories, is actually available for the load capacity of vehicles

delivered by ERIBA. The actual weight of your vehicle after leaving the factory can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls short of the minimum payload due to a permissible weight deviation, despite the limitation of the optional equipment, we will check together with your trading partner and you before delivery of the vehicle whether we should, for example, increase the load capacity of the vehicle or remove optional equipment. The technically permissible maximum laden mass of the vehicle must not be exceeded. For detailed information and explanations on the topic of weight and the configuration of the vehicle, please refer to the "Legal notes" section.

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the payload. The specified additional weight for packages and optional equipment shows the additional weight compared with the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the mass for optional equipment specified by the manufacturer in the model overviews. This is an imputed value determined for

each model and layout that ERIBA uses to determine the maximum weight available for factory-installed optional equipment. In the event of an increase of load capacity, the mass for optional equipment specified by the manufacturer is increased. For detailed information and explanations on the topic of weight, please refer to the "Legal notes" section.

PACKS ERIBA TOURING

Package	Comfort package Touring 310	Comfort package
Mosquito net door (entire door height), user-friendly thanks to lateral guidance	●	●

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the payload. The specified additional weight for packages and optional equipment shows the additional weight compared with the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the mass for optional equipment specified by the manufacturer in the model overviews. This is an imputed value determined for

each model and layout that ERIBA uses to determine the maximum weight available for factory-installed optional equipment. In the event of an increase of load capacity, the mass for optional equipment specified by the manufacturer is increased. For detailed information and explanations on the topic of weight, please refer to the "Legal notes" section.

MUCH MORE THAN JUST A SILVER LINING ...

The 'Silver Edition' lettering on the sides, rear, and front of the motorhome blends smoothly into the overall design. This special Touring model, finished in Crystal Silver, offers timeless style down to the last detail.

... BOTH INSIDE AND OUT.

Subtle yet very cozy: that's the interior of the Silver Edition. The new upholstery fabric, Seattle Stone, combined with warm wood and natural tones, creates an inviting atmosphere.

KEEPING IT ON THE GROUND.

High-quality finishes are found throughout the ERIBA Touring Silver Edition. The new concrete-look flooring inside the caravan creates a very modern look, contrasting with the wood and fabric surfaces.

▲ Mandatory
□ Available in package

△ Not known at the time of publication

* INFO

The specified mass in running order is a standard value defined in the type approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5% of the mass in running order are legally permissible and possible. The permissible range in kilograms is stated in parentheses after the mass in running order. The mass for optional equipment specified by the manufacturer is an imputed value determined for each type and layout by which ERIBA specifies the maximum weight available for factory-fitted optional equipment. The purpose of limiting optional equipment is to ensure that the minimum payload, i.e. the legally required free mass for baggage and retrofitted accessories, is actually available for the load capacity of vehicles

delivered by ERIBA. The actual weight of your vehicle after leaving the factory can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls short of the minimum payload due to a permissible weight deviation, despite the limitation of the optional equipment, we will check together with your trading partner and you before delivery of the vehicle whether we should, for example, increase the load capacity of the vehicle or remove optional equipment. The technically permissible maximum laden mass of the vehicle must not be exceeded. For detailed information and explanations on the topic of weight and the configuration of the vehicle, please refer to the "Legal notes" section.

* INFO

The specified mass in running order is a standard value defined in the type approval procedure. Due to manufacturing tolerances, the actual weighed mass in running order may deviate from the value stated above. Deviations of up to ± 5% of the mass in running order are legally permissible and possible. The permissible range in kilograms is stated in parentheses after the mass in running order. The mass for optional equipment specified by the manufacturer is an imputed value determined for each type and layout by which ERIBA specifies the maximum weight available for factory-fitted optional equipment. The purpose of limiting optional equipment is to ensure that the minimum payload, i.e. the legally required free mass for baggage and retrofitted accessories, is actually available for the load capacity of vehicles

delivered by ERIBA. The actual weight of your vehicle after leaving the factory can only be determined when it is weighed at the end of the line. If, in exceptional cases, the weighing shows that the actual load capacity falls short of the minimum payload due to a permissible weight deviation, despite the limitation of the optional equipment, we will check together with your trading partner and you before delivery of the vehicle whether we should, for example, increase the load capacity of the vehicle or remove optional equipment. The technically permissible maximum laden mass of the vehicle must not be exceeded. For detailed information and explanations on the topic of weight and the configuration of the vehicle, please refer to the "Legal notes" section.

STANDARD EQUIPMENT ERIBA FEELING AND NOVALINE

Chassis									
Fully galvanized lightweight system chassis with galvanized axle body	●	●	●	●	●	●	●	●	●
14" steel rims ²⁷⁾	●	●	●	●	●	●	●	●	●
Extra long drawbar for more driving stability and enough space for a drawbar carrier	●	●	●	●	●	●	●	●	●
Trailing arm axle with independent wheel suspension	●	●	●	●	●	●	●	●	●
Automatic brake adjustment (short braking distances and more driving comfort due to gentle braking without jerky acceleration)	●	●	●	●	●	●	●	●	●
Anti-sway coupling with friction linings and one-hand operation (suppresses rolling and pitching movements)	●	●	●	●	●	●	●	●	●
Spare wheel bracket located in the gas bottle compartment	●	●	●	●	●	●	●	●	●
Galvanized plug-in corner steadies	●	●	●	●	●	●	●	●	●
Body									
Side walls in smooth sheet metal, Color: White	●	●	●	●	●	●	●	●	●
Front, roof and rear, Colour: White	●	●	●	●	●	●	●	●	●
Pop-top roof with 30 mm Sandwich insulation (PU), Colour: Carrara white	●	●	●	—	—	—	—	—	—
Pop-top roof tent fabric with ventilation and integrated mosquito net	●	●	●	—	—	—	—	—	—
Curtained windows with comfortable pleated blinds and ventilation control	●	●	●	●	●	●	●	●	●
All windows tinted and with double acrylic glazing	●	●	●	●	●	●	●	●	●
One-piece entrance door with storage shelf and storage net on the inside of the door	●	●	●	●	●	●	●	●	●
Insulated gas bottle compartment with robust aluminum checker plate floor and low loading edge	●	●	●	●	●	●	●	●	●
Integrated front storage compartment for 2x11 kg gas bottles, spare wheel, waste water tank, level chocks	●	●	●	●	●	●	●	●	●
Stable grab handles at the front, continuous manoeuvring handle at the rear	●	●	●	●	●	●	●	●	●
External storage flap, 100 x 40 cm, RH side, rear	●	●	—	●	●	—	●	●	—
External storage flap, 100 x 40 cm, RH side, front	—	—	●	—	—	●	—	—	—
External storage flap, 100 x 60 cm, RH side, front	—	—	—	—	—	—	—	—	●
External storage flap incl. foldable slatted frame for maximum storage, 45 x 100 cm, RH side	—	—	—	—	—	—	—	—	●
Outfitting									
Spacious wardrobe with clothes rail and laundry compartment (shelf height adjustable)	●	●	●	●	●	●	●	●	●
Lashing eyes in the bed storage compartment	●	●	●	●	●	●	●	●	●
Fabrics & Furniture finishes									
Furniture finish: Biarritz	●	●	●	●	●	●	●	●	●
Fabric combination Seattle Stone	●	●	●	●	●	●	●	●	●
Living and bedroom + lighting									
Ambient lighting: spotlights in the corners of the roof storage cabinet floor in the sleeping area and the seating area (4 spotlights)	●	●	●	●	●	●	●	●	●
Multifunctional rechargeable light with magnetic mount, additional adhesive pad and USB-C connection for charging	●	●	●	●	●	●	●	●	●
12 V LED lighting	●	●	●	●	●	●	●	●	●
LED awning light with motion detector	●	●	●	●	●	●	●	●	●
All fixed beds with cold foam mattresses with removable and washable mattress covers	●	●	●	●	●	●	●	●	●
Bed conversion of seating group possible	●	●	●	●	●	●	●	●	●
Wooden bed slats under all fixed beds, foldable	●	●	●	●	●	●	●	●	●
Optimum sleeping environment by air circulation via openings in the pop-top roof (chimney effect)	●	●	●	●	●	●	●	●	—
Multifunctional rail in the seating area, including storage compartment	●	●	●	●	●	●	●	●	●
High-quality fabric side wall covering for a cosy atmosphere	●	●	●	●	●	●	●	●	●
Optimum sleeping environment by air circulation via openings in the pop-top roof (chimney effect)	●	●	●	—	—	—	—	—	—
Bunk bed in the front, lower bunk bed folds up ideal for bulky luggage	—	—	—	—	—	—	—	—	●
Open shelves in the overhead storage compartment in the seating area	—	—	—	●	●	●	●	●	●
Kitchen									
2-burner stove with safety ignition, electric ignition, flame protection and glass cover	●	●	●	●	●	●	●	●	●
Cooker control buttons removable for cleaning	●	●	●	●	●	●	●	●	●
Stainless steel sink	●	●	●	●	●	●	●	●	●
Foldable kitchen worktop extension	●	●	●	●	—	●	●	●	●
Foldable kitchen worktop extension	—	●	●	●	—	●	●	●	—
Kitchen drawer with Servo Soft feature	●	●	●	●	●	●	●	●	●
83 l compressor refrigerator incl. freezer compartment (power source 12 V or 230 V)	●	—	●	—	●	●	—	—	—
133 l compressor refrigerator incl. freezer compartment and double hinge (power source 12 V or 230 V)	—	●	—	●	—	—	●	●	●
Kitchen lighting: strip light below the wall cabinets	●	●	●	●	●	●	●	●	●
Bathroom									
Bathroom window can be opened, frosted glass with comfortable pleated blind	●	●	●	●	●	●	●	●	●
Upper cabinet with mirror and shelves	●	●	●	●	●	●	●	●	●

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the payload. The specified additional weight for packages and optional equipment shows the additional weight compared with the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the mass for optional equipment specified by the manufacturer in the model overviews. This is an imputed value determined for

each model and layout that ERIBA uses to determine the maximum weight available for factory-installed optional equipment. In the event of an increase of load capacity, the mass for optional equipment specified by the manufacturer is increased. For detailed information and explanations on the topic of weight, please refer to the "Legal notes" section.

* INFO

The factory installation of optional equipment increases the actual mass of the vehicle and reduces the payload. The specified additional weight for packages and optional equipment shows the additional weight compared with the standard equipment of the respective model or layout. The total weight of the selected optional equipment must not exceed the mass for optional equipment specified by the manufacturer in the model overviews. This is an imputed value determined for

each model and layout that ERIBA uses to determine the maximum weight available for factory-installed optional equipment. In the event of an increase of load capacity, the mass for optional equipment specified by the manufacturer is increased. For detailed information and explanations on the topic of weight, please refer to the "Legal notes" section.

ERIBA ORIGINAL ACCESSORIES FOR YOUR CARAVAN

The ERIBA Original Accessories product range offers you a variety of solutions with added value that combine an excellent fit with harmonious design – and, of course, in the renowned ERIBA quality. Whether you want to extend your living area or protect yourself from cold weather in your caravan, we have the perfect items to ensure your holidays are carefree.

Travel small – live big: No problem with the Isabella awning for all Touring model ranges

The living area of your Touring caravan can be easily extended with a tent, enabling you to make use of the area outdoors when camping. Whatever the weather does.

ERIBA kitchen pull-out

With the practical kitchen pull-out, you can tidy up your caravan in no time at all. The pull-out can be assembled in just a few steps. The sturdy pull-out basket offers enough storage space for everything you need in the kitchen.

ERIBA winter canvas

The protective winter canvas, specially designed for the ERIBA Touring, is light, breathable and tear-proof. It is also a perfect fit and can be attached in just a few minutes. The three-piece set consists of left and right side walls, as well as a roof piece.

ERIBA insulation

Whether or not the pop-top roof has a bed, the insulation from ERIBA Original Accessories provides effective protection from the cold. It is attached in front of the canvas material of the roof from inside. This means that it can also be used in cold weather without any problems.

ERIBA blankets and towels

Outstanding quality and colour-coordinated with the interior – the ERIBA Colour Collection. The blankets and towels are available in the colours NUGGET GOLD, HARBOUR BLUE, SIMPLY TAUPE and TANGO RED.

ERIBA toiletry bag

The ERIBA toiletry bag is a must-have on holiday. Available in the colours SIMPLY TAUPE, HARBOUR BLUE and NUGGET GOLD, it boasts an eye-catching look inspired by the original design of the ERIBA Touring and is a handy little solution for keeping your toiletries neat and tidy.

Tailor-made solutions for your sleeping comfort, awnings and bicycle racks and much more are also available from ERIBA Original Accessories. Take a look at the entire product range of ERIBA Original Accessories.

NOTE

Original accessories are not available direct from the factory, but are instead ordered and retrofitted exclusively via your ERIBA dealer. The items are retrofitted to the vehicle following delivery from the factory and are not the responsibility of the manufacturer. Original ERIBA parts and accessories that are retrofitted to a vehicle affect the payload capacity and axle loads.

Please note that the technically permissible maximum laden mass on the axle must not be exceeded even after fitting the original ERIBA parts and accessories. For further information and explanations on the topic of weight, please refer to our weight information.

NOTES:

Any modification of the original factory condition of your vehicle may result in impaired driving and / or driving safety.

Please note that the standard series equipment may be omitted when ordering optional extras. Individual package contents can sometimes also be ordered separately. Since not all dependencies of single optional extras can be listed here, please check with your ERIBA dealer.

Accessories and original spare parts recommended by Hymer GmbH & Co KG are designed, developed and approved specifically for your vehicle. Your ERIBA dealer supplies these products; he is informed about all the technical details and can perform the necessary work in the correct manner. Accessories not approved by Hymer GmbH & Co KG, additions, alterations or installation parts can cause damage to the vehicle and reduce road safety. Even if there is an opinion of an expert or a parts-ABE type approval, Hymer GmbH & Co KG can not guarantee as to the proper nature of the product.

Please understand that for any damage caused by non-approved products or not allowable changes, liability for Hymer GmbH & Co KG can NOT be accepted.

Weight figures are approximate values. Due to the processing of natural materials, deviations of +/- 5% in the mass in running order are possible and permissible, and may have an impact on the payload stated in the price list.

Your ERIBA dealer will be happy to help you with any uncertainties or questions.

The payload listed is reduced when fitting optional extras by the weights listed in the price list.

The data regarding scope of delivery, appearance, performance, dimensions, weight, payload are correct at time of printing and are not binding. These may be subject to minor changes (+/- 5%).

Your ERIBA dealer will gladly provide information on changes and the standard scope of supply.

In direct sunshine onto the exterior panel of the ERIBA Touring models, heat development can lead to a certain irregularity in the exterior appearance. This is due to the unique handmade steel cage construction and is not a quality defect.

The prices indicated are only valid for optional extras if fitted in the production of a new vehicle. The retrofitting of some optional extras is sometimes not possible or associated with considerable additional costs.

This price list includes the series status at the time of printing. Despite checking the contents, errors can not be excluded. In the course of the model year, we reserve the right to change equipment and to make product improvements.

The layouts are partially shown with optional extras which are available at extra cost, these are not part of the standard scope of delivery.

The water installation system is at least state-of-the-art as of 07/2011 (EG directive 2002/72/EG). Before signing a sales contract, please inform yourself about our current product and series status with one of our approved ERIBA dealer.

All prices are recommended retail prices in Euro including legal applicable VAT ex works. Freight from Germany, first registration fee and handover are not included and will be charged separately.

Changes in price, design and equipment are possible without prior notice.

This price list supersedes all previous ones.

Collection / Pick-up

Collection / Pick-up of your caravan at the factory is not possible.

Technical data

*) Data not available at time of going to press.

FOOTNOTES

- 1) Battery charge indicator only possible in conjunction with AGM or lithium batteries.
- 2) Optional extension possibilities via ERIBA Connect starter pack.
- 3) Only available in combination with the steel rims.
- 4) The chrome coating of the wheel trim is not corrosion resistant and therefore not suitable for winter use.
- 5) Tire size depends on the chassis.
- 6) The optional spare wheel must correspond to the selected tires. This means that the spare wheel on an alloy wheel can only be ordered with tires on alloy rim. The spare wheel on steel rims only in combination with tires on steel rims.
- 7) When ordering the optional mover, order of the electric autonomy package is mandatory.
- 8) If the sleeping roof is ordered, the overall height of the vehicle increases to 240 cm.
- 9) The sleeping roof and shower equipment options are mutually exclusive. Only one of these items can be ordered.
- 10) Only available in combination with rear seating group or optional single beds with pull-out bed slats and free-standing table.
- 11) On the Touring 430, 540 and 542, the exterior storage compartment flap at the rear left is not available in conjunction with the 10l gas boiler.
- 12) With layout 540 only possible with seating group in the rear.
- 13) Please note that the Touring bike carrier has a small distance between the mounting rails, which means that only one bike can be transported if you have large/wide bikes.
- 14) The Seattle Stone fabric combination is only available in conjunction with the Silver Edition.
- 15) With removable bedside table and removable free-standing table as well as additional cushion parts for bed conversion of the round seating group. Extendable slatted frame / back seat with Velcro band divided to broaden the lying surface.
- 16) Spring mattress option only available in combination with transverse bed or optional "single beds with extendable slatted frame and free-standing table".
- 17) Mattress with matching cover (living room fabric).
- 18) The Eriba Connect starter pack can be paired to the vehicle app via Bluetooth.
- 19) TV pre-wiring is included when ordering the universal awning socket, but without any final fittings (i.e. no TV socket inside the vehicle).
- 20) Please note that the 12V plug will not work without a starter battery.
- 21) When ordering the optional autonomy package, the 230 V hot air blower (partly available as optional extra) is replaced by a 12 V hot air blower.
- 22) Not in combination with another battery.
- 23) Not in combination with AGM battery.
- 24) The options electric water boiler with 5 l water content and 10 l gas boiler cancel each other. Only one of these positions can be ordered.
- 25) For a longer service life of the gas pressure regulator with crash sensor, the use of a gas filter is recommended to protect against contamination and oiling.
- 26) Only in combination with gas pressure regulator with crash sensor.
- 27) From a load capacity of 1,600 kg, 15" alloy wheels are mandatory.
- 28) Only possible up to a load of 1,500 kg.
- 29) When ordering the sleeping roof, the total height of the vehicle increases to 246 cm.
- 30) Not possible in conjunction with the panoramic roof vent.
- 31) The options sleeping roof and awning cancel each other. Only one of these positions can be ordered.
- 32) Not compatible with the solar system
- 33) Not possible in combination with the sleeping roof.
- 34) Bei Bestellung des Panorama Dachlüfters erhöht sich die Gesamthöhe des Fahrzeugs um ca. 13,5 cm.
- 35) Carpet and electric floor tempering cancel each other. Only one of these options can be ordered.
- 36) Only in conjunction with Duo Control.
- 37) Only in combination with a battery (AGM or lithium).
- 38) The functionality of the solar system as a retrofit solution is only guaranteed with an add-on battery.
- 39) Only possible in conjunction with a TV preparation or multimedia package.
- 40) If the multimedia package is selected, the power socket package or the moving package is required.
- 41) GRP roof not available in combination with an awning.
- 42) When ordering the roof air conditioning system, the total height of the vehicle increases by 15 cm.

LEGAL NOTES ON WEIGHT-RELATED INFORMATION

The weight specifications and tests for caravans are regulated uniformly throughout the EU in EU Implementing Regulation No. 2021/535 (until June 2022: EU Regulation No. 1230/2012). We have summarized and explained the essential terminology and legal requirements from this regulation for you below. Our dealers and the ERIBA configurator on our website are there to give you additional assistance in configuring your vehicle.

1. Technically permissible maximum laden mass

The technically permissible maximum laden mass of the vehicle (e.g. 2,000 kg) is a mass specification defined by the manufacturer that the vehicle must not exceed. You can find information on the technically permissible maximum laden mass of the model you have selected in the technical data. Driving the vehicle even if it exceeds the technically permissible maximum laden mass constitutes an administrative offense that may result in a fine.

2. Mass in running order

In simple terms, the mass in running order is the basic vehicle with standard equipment. This essentially includes the following items:

- > the unladen weight of the vehicle together with the bodywork, including operating fluids;
- > the standard equipment, i.e. all equipment and standard fittings included when the vehicle leaves the factory;
- > the 100% filled water tank or drinking tank according to the manufacturer's specifications and a 100% filled aluminum gas cylinder.

You can find information on the mass in running order for each model in our sales documents. It is important to note that the value specified in the sales documents for the mass in running order is a standard value determined in the type approval process and verified by the authorities. It is legally permissible and possible for the mass in running order of the vehicle delivered to you to deviate from the nominal value specified in the sales documents. The legally permissible tolerance is $\pm 5\%$. This allows EU legislation to account for the occurrence of certain fluctuations in the mass in running order due to weight fluctuations in components supplied by third-party suppliers as well as process and weather-related factors. These weight deviations can be illustrated using the following example calculation:

- > Mass in running order according to sales documents: 1,600 kg
- > Legally permissible tolerance of $\pm 5\%$: 80 kg
- > Legally permissible range of mass in running order: 1,520 kg to 1,680 kg

The specific range of permissible weight deviations can be found in the technical data for each model.

ERIBA makes great efforts to reduce weight variations to the minimum level that is unavoidable for production reasons. Deviations at the upper and lower ends of the range are therefore very rare; however, they cannot be completely ruled out technically, even after carrying out all possible optimization measures. For this reason, ERIBA checks the actual weight of the vehicle and compliance with the permissible tolerance by weighing each vehicle at the end of the line.

3. Optional equipment and actual mass

According to the legal definition, optional equipment (also including special or additional equipment) includes all optional equipment parts not included with the standard equipment that are fitted to the vehicle under the responsibility of the manufacturer – i.e. at the factory – and can be ordered by the customer (e.g. awning, smooth panel, Alde heating system, oven, etc.). For information on the individual or package weights of the optional equipment that can be ordered, please refer to our sales documents. In this meaning, optional equipment does not include other accessories that are retrofitted by you or your dealer personally after the vehicle has been delivered from the factory.

The mass of the vehicle in running order (see no. 2 above) and the mass of the optional equipment installed on a specific vehicle at the factory are together referred to as the actual mass. You will find the corresponding information for your vehicle after handover under item 13.2 of the Certificate of Conformity (CoC). Please note that this information also represents a standardized value. Since the mass in running order – as an element of the actual mass – is subject to a legally permissible tolerance of $\pm 5\%$ (see no. 2), the actual mass may also deviate accordingly from the specified nominal value.

4. Payload and minimum payload

The installation of optional equipment is also subject to technical and legal limits: It is only permissible to order an amount of optional equipment for installation at the factory that will leave sufficient free weight for baggage and other accessories (i.e. "payload") without exceeding the technically permissible maximum laden mass.

The payload is obtained by deducting the mass in running order (nominal value according to sales documents; see no. 2 above) and the mass of the optional equipment from the technically permissible maximum laden mass (see no. 1 above).

The EU regulations stipulate a fixed minimum payload for caravans that must remain as a minimum for baggage or other accessories not installed at the factory. This minimum payload is calculated as follows:

Minimum payload in kg $\geq 10 \cdot (n + L)$

where "n" = maximum number of sleeping berths and "L" = total length of the vehicle body (without drawbar).

The maximum number of sleeping berths corresponds to the actual configured sleeping berths of the individual vehicle.

For a caravan with 6 designated sleeping berths and a total length of the vehicle body of 7 m, the minimum payload is calculated as follows: $10 \text{ kg} \cdot (6 + 7) = 130 \text{ kg}$.

To ensure that the minimum payload is maintained, there is a maximum combination of optional equipment that can be ordered for each vehicle model. In the above example with a minimum payload of 130 kg, the total mass of the optional equipment for a vehicle with 6 designated sleeping berths and a mass in running order of 1,750 kg should not exceed 120 kg:

- 2,000 kg technically permissible maximum laden mass
- 1,750 kg mass in running order
- 130 kg minimum payload
- = 120 kg maximum permissible mass for optional equipment

It is important to note that this calculation is based on the standard value for the mass in running order specified in the type approval procedure and does not account for permissible weight deviations for the mass in running order (see no. 2 above).

If the maximum permissible value of 120 kg for the optional equipment is nearly or fully exhausted in this example and the standard value of the mass in running order is applied, it is possible for the minimum payload of 130 kg to be complied with mathematically in the event of an upward weight deviation even if the vehicle has no load capacity.

Here is another example calculation for a vehicle with 6 sleeping berths whose actual weighed mass in running order is 2% above the nominal value:

- 2,000 kg technically permissible maximum laden mass
- 1,785 kg actual weighed mass in running order (in the example: 2% higher than the specified value of 1,750 kg)
- 120 kg optional equipment (maximum permissible value)
- = 95 kg actual load capacity (< minimum pay-mass of 130 kg)

To avoid such a situation, ERIBA further reduces the maximum permissible weight of the total optional equipment that can be ordered depending on the specific model.

The limitation of optional equipment is intended to ensure that the minimum payload, i.e. the legally prescribed free mass for baggage and retrofitted accessories, is actually available for the load capacity of the vehicles delivered by ERIBA.

Since the weight of a specific vehicle can only be determined when it is weighed at the end of the line, in very rare cases a situation may arise in which the minimum payload is not guaranteed at the end of the line despite this limitation of optional equipment.

In order to guarantee the minimum payload even in these cases, ERIBA will check together with your trading partner and you before delivery of the vehicle whether, for example, the load capacity of your vehicle is to be increased or optional equipment removed.

5. Effects of tolerances of the mass in running order on the remaining load capacity

Irrespective of the minimum payload, you should bear in mind that unavoidable production-related fluctuations in the mass in running order – both upwards and downwards – have a corresponding effect on the remaining load capacity: If, for example, you order our example vehicle with optional equipment with a total weight of 90 kg, the calculated payload based on the standard value for the mass in running order is 160 kg.

The load capacity actually available may deviate upwards or downwards from this value due to tolerances.

If the mass of your vehicle in running order is approximately 2% higher than specified in the sales documents, the load capacity is reduced from 160 kg to 125 kg:

- 2,000 kg technically permissible maximum laden mass
- 1,785 kg actual weighed mass in running order (in the example: 2% higher than the specified value of 1,750 kg)
- 90 kg ordered optional equipment of the specific vehicle
- = 125 kg actual load capacity

In order to ensure that the calculated payload is actually adhered to, you should therefore take the possible and permissible tolerances for the mass in running order into account as a precaution when configuring your vehicle.

We also recommend weighing the loaded caravan on a scale before each journey to check whether the technically permissible total weight is adhered to. In addition, we recommend checking the actual drawbar load of the loaded vehicle. This must not be higher than the max. drawbar load of the towing vehicle. Furthermore, the technically permissible maximum laden mass of the vehicle combination must be observed when loaded, i.e. the maximum mass of the combination of your motor vehicle and your caravan.

Please note

This price list describes the series status at the time of printing. Despite checking the contents, printing errors cannot be ruled out. We reserve the right to make equipment changes or product improvements in the course of the model year. Please contact one of our authorised ERIBA dealers for information in the current product and series status before concluding a contract.

Some of the vehicles are shown with optional extras, which are included in the current price list and are available at an extra charge. The decoration shown is not part of the ERIBA scope of delivery. The information on scope of delivery, appearance, performance, dimensions and weights of the vehicles - deviations within the factory tolerances (+/- 5 % max.) are possible and permissible - corresponds to the knowledge available at the time of printing.

The information provided complies with European homologation regulations; these may change until the vehicle is purchased or until delivery. Your ERIBA dealer will be pleased to inform you about any changes and the standard scope of delivery.
